

Conditions Not Treated At Our Facility

We have specialist level expertise in managing a wide range of rheumatology-specific autoimmune diseases in adults and select non-autoimmune regional musculoskeletal conditions. To help you determine if what you are looking for will be an appropriate fit for the services we offer, the below includes but is not limited to the list of conditions that are outside of the scope of our work. That means that these conditions are not treated at our clinic. Please call your insurance company to find another facility that treats these conditions so that your needs may be met.

Chronic pain	Nonspecific neck or back pain
Chronic fatigue syndrome	Neuropathy
Drugs of fibromyalgia	Migraine
Long COVID	Raynaud without systemic disease
Chronic lyme disease	Psoriasis without arthritis
Breast implant disease	Skin-only lupus
Ehler danlos	Multiple sclerosis
Marfan	Hashimoto disease
Osteogenesis imperfecta	Graves disease
POTS syndrome	Celiac disease
Primary care or Urgent care	Irritable bowel syndrome

Our clinicians' licensing and scope training is limited to the medical care of Adult patients only. Adult as defined by law is age 18 years and older. There is no upper age limit of patients we treat. Please call your insurance company to find a Pediatric facility if you are less than 18 years of age.
