

August 2025

Due to employee turnover within the last year, the doctor has had to “absorb” patients and has been doing the workload of 2 people since then.

The physician's patient roster is at maximum capacity, so we have stopped adding new patients to ensure we can provide the best care to our existing patients without compromising the quality of care or exceeding our workload capacity.

Should this change in the future we will update this announcement. Due to continued demand for service, we are open to hiring a second physician to take on new patients if the right fit comes our way.
